Selection Criteria:

- Completion of at least four years of tertiary study or equivalent.
- Experience teaching physiology, biochemistry and/or cell biology at the undergraduate level.
- Knowledge and experience in contemporary teaching methods (including self-directed learning, web-based learning, small group learning, problem based learning and contemporary assessment practices) and the ability to maintain academic standards.
- Outstanding communication and interpersonal skills, including the ability to collaborate and perform effectively within an inter-disciplinary and international environment.
- Demonstrated success as a teacher and commitment to the provision of high quality teaching and student support.
- Commitment to promoting the Faculty of Health Sciences and Medicine at the highest levels in the external environment, including participation in marketing and promotional activities.
