Selection Criteria

Associate Professor/Professor – Neurophysiology/Neurobiology – HSM1562

Faculty of Health Sciences and Medicine

Selection Criteria:

1. Possession of a relevant PhD or equivalent in one of the medical sciences, preferably in physiology or neurophysiology.
2. Experience teaching physiology/neurophysiology/neurobiology integrated across undergraduate biomedical science, exercise science and medicine and other postgraduate programs at University level.
3. Knowledge and experience in contemporary teaching methods, including self-directed learning, web-based learning, small group learning, problem-based learning and contemporary assessment practices.
4. Experience and track record working as part of a multi-disciplinary team in teaching and research at University level.
5. A track record of productive research performance (including research income, publications) and research capacity building via research collaboration and leadership.
6. Experience in supervising and supporting HDR students to timely completion.
7. Demonstrated leadership skills within an academic, research or similar unit.
8. High level interpersonal and group communication skills, with the capacity to liaise and build effective working relationships at all levels with University staff and external partners.
