We are seeking to appoint an Assistant Professor in Finance, equivalent to Level B or Level C.

Applicants are required to demonstrate:

- PhD in finance or a related relevant field.
- Strong research training and skills.
- Established or emerging publication record in any of the areas mentioned below.
- Evidence of excellence in teaching at both undergraduate and master’s level in finance, including one or more specialised areas from derivatives, capital markets, quantitative investments, risk management, asset pricing, market microstructure, or financial modelling, and willingness to innovate in teaching methods.
- Fluency in relevant computing languages such as R and Matlab.
- Commitment to delivering the highest quality teaching and learning experience for undergraduate and masters students in Finance.
- Willingness to engage in departmental, faculty, and university service as well as curriculum development.
- High quality interpersonal and communication skills, and demonstrated commitment to teamwork and collegiality.
- Willingness and ability to collaborate across disciplines such as actuarial science, statistics, or informatics on leading edge research, including involvement in the Centre for Actuarial and Financial Big Data Analytics.
- Willingness to engage with the broader community, such as industry, professional associations, and/or schools.

The following attributes are highly regarded:

- Experience using large scale financial data bases and/or big data techniques.
- Knowledge of blended learning and on-line delivery pedagogical tools and strategies.
- Links/involvement/experience with industry.
