Examples of Performance Indicators

Professional Behaviour

1. Demonstrates an understanding of client rights and consent
   - obtains & records informed consent according to protocol
   - recognises clients’ health-care rights
   - prioritises clients’ rights, needs & interests
   - allows sufficient time to discuss the risks & benefits of the proposed treatment with clients & carers
   - refers clients to a more senior staff member for consent when appropriate
   - advises supervisor or other appropriate person if a client might be at risk
   - respects clients’ privacy & dignity
   - complies with confidentiality & privacy requirements for client’s health & personal information
   - applies ethical principles to the collection, maintenance, use & dissemination of data & information

2. Demonstrates commitment to learning
   - responds in a positive manner to questions, suggestions &/or constructive feedback
   - reviews & prepares appropriate material before & during placement
   - develops & implements a plan of action in response to feedback
   - seeks information/assistance as required
   - demonstrates self-evaluation, reflects on progress & implements appropriate changes based on reflection
   - takes responsibility for learning & seeks opportunities to meet learning needs
   - uses clinic time responsibly

3. Demonstrates ethical, legal & culturally responsive practice
   - follows policies & procedures of the facility
   - advises appropriate staff of circumstances that may affect adequate work performance
   - observes infection control, & workplace health & safety policies
   - arrives fit to work
   - arrives punctually & leaves at agreed time
   - calls appropriate personnel to report intended absence

4. Demonstrates collaborative practice
   - demonstrates understanding of team processes
   - contributes appropriately in team meetings
   - acknowledges expertise & role of other health care professionals & refers/liases as appropriate to access relevant services
   - advocates for the client when dealing with other services
   - collaborates with the health care team & client to achieve optimal outcomes
   - cooperates with other people who are treating & caring for clients
   - guides & motivates support staff (where appropriate)
   - works collaboratively & respectfully with support staff

Communication

5. Communicates effectively and appropriately - Verbal/non-verbal
   - greets others appropriately
   - questions effectively to gain appropriate information
   - listens carefully & is sensitive & empathetic to views of client & relevant others
   - respects cultural & personal differences of others

   - wears an identification badge & identifies self
   - recognises inappropriate or unethical health practice
   - observes dress code
   - completes projects/tasks within designated time frame
   - maintains appropriate professional boundaries with clients & carers
   - advocates for clients & their rights (where appropriate)
   - demonstrates appropriate self-care strategies (e.g. management of stress, mental & physical health issues)
   - acts ethically & applies ethical reasoning in all health care activities
   - demonstrates skills in culturally safe & responsive client-centred practice
   - acts within bounds of personal competence, recognizing personal & professional strengths & limitations

   - gives appropriate, positive reinforcement
   - provides clear instructions
   - uses suitable language & avoids jargon
   - demonstrates an appropriate range of communication styles (with e.g. clients, carers, administrative & support staff, health professionals, care team)
   - recognises barriers to optimal communication
   - responds appropriately to non-verbal cues
   - integrates communication technology into practice as required
   - uses a range of communication strategies to optimize client rapport & understanding (e.g. hearing impairment, non-English speaking, cognitive impairment, consideration of non-verbal communication)
   - uses accredited interpreters appropriately
   - maintains effective communication with clinical educators
   - recognises risk of conflict & takes appropriate action to mitigate &/or resolve
   - actively explains to clients & relevant others their role in care, decision-making & preventing adverse events
   - actively encourages clients to provide complete information without embarrassment or hesitation
   - conducts communication with client in a manner & environment that demonstrates consideration of confidentiality, privacy & client’s sensitivities
   - negotiates appropriately with other health professionals

6. Demonstrates clear and accurate documentation
   - writes legibly
   - completes relevant documentation to the required standard (e.g. client record, statistical information, referral letters)
   - maintains records compliant with legislative medico-legal requirements
   - complies with organisational protocols & legislation for communication
   - adapts written material for a range of audiences (e.g. provides translated material for non-English speaking people, considers reading ability, age of client)
   - recognises inappropriate or unethical health practice
   - observes dress code
   - completes projects/tasks within designated time frame
   - recognizes inappropriate or unethical health practice
   - maintains appropriate professional boundaries with clients & carers
   - advocates for clients & their rights (where appropriate)
   - demonstrates appropriate self-care strategies (e.g. management of stress, mental & physical health issues)
   - acts ethically & applies ethical reasoning in all health care activities
   - demonstrates skills in culturally safe & responsive client-centred practice
   - acts within bounds of personal competence, recognizing personal & professional strengths & limitations

Assessment

7. Conducts an appropriate client interview
   - positions person safely & comfortably for interview
   - structures a systematic, purposeful interview seeking qualitative & quantitative details
   - provides a culturally safe environment for the client
   - asks relevant & comprehensive questions
   - politely controls the interview to obtain relevant information
   - responds appropriately to important client cues
   - identifies client’s goals & expectations
   - conducts appropriate assessment with consideration of the social, personal, environmental & biopsychosocial factors that influence function, health & disability.
   - seeks appropriate supplementary information, accessing other information, records, test results as appropriate & with client’s consent
   - generates diagnostic hypotheses, identifying priorities & urgency of further assessment & intervention
   - completes assessment in acceptable time

8. Selects and measures relevant health indicators and outcomes
   - selects appropriate variable/s to be measured at baseline from WHO ICF domains of impairment, activity limitation & participation restriction.
   - identifies & justifies variables to be measured to monitor treatment response & outcome.
   - selects appropriate tests/outcome measures for each variable for the purpose of diagnosis, monitoring & outcome evaluation.
   - links outcome variables with treatment goals
   - communicates the treatment evaluation process & outcomes to the client & relevant others
   - identifies, documents & acts on factors that may compromise treatment outcomes

9. Performs appropriate physical assessment procedures
   - considers client comfort & safety
   - respects client’s need for privacy & modesty (e.g. provides draping or gown)
   - structures systematic, safe & goal oriented assessment processes accommodating limitations imposed by client’s health status
   - plans assessment structure & reasoning process using information from client history & supportive information
Examples of Performance Indicators

13. Selects appropriate intervention in collaboration with the client
- engages with client to explain assessment findings, discuss intervention strategies & develop an acceptable plan
- identifies & justifies options for interventions based on client needs, clinical guidelines, best evidence & available resources
- considers whether physiotherapy is indicated
- demonstrates a suitable range of skills & approaches to intervention
- describes acceptable rationale (e.g. likely effectiveness) for treatment choices
- balances needs of clients & relevant others with the need for efficient & effective intervention
- demonstrates understanding of contraindications & precautions in selection of intervention strategies
- advises client about the effects of treatment or no treatment

15. Is an effective educator
- demonstrates skill in client education & health promotion e.g. modifies approach to suit client age group &/or relevant needs
- applies adult learning principles in education of clients & relevant others
- educates assistants & relevant others to implement safe & effective therapy
- participates in leading educational activities for peers/staff (where appropriate)
- demonstrates skills in conducting group sessions
- develops a realistic self-management program for prevention & management in collaboration with the client
- provides information using a range of strategies that demonstrate consideration of client needs
- confirms client’s/relevant others’ understanding of given information
- uses appropriate strategies to motivate the client & relevant others to participate & to take responsibility for achieving defined goals
- discusses expectations of physiotherapy intervention & its outcomes
- provides feedback to client regarding health status
- educates the client in self-evaluation
- encourages & acknowledges achievement of short & long term goals

16. Monitors the effects of intervention
- incorporates relevant evaluation procedures/outcome measures in the physiotherapy plan
- monitors client response to the intervention
- makes modifications to intervention based on therapist evaluation & client feedback
- records & communicates outcomes where appropriate

18. Undertakes discharge planning
- begins discharge planning in collaboration with the health care team at the time of the initial episode of care
- discusses discharge planning with the client
- describes strategies that may be useful for maintaining or improving health status following discharge
- arranges appropriate follow-up health care to meet short & long term goals
- addresses client & carer needs for ongoing care through the coordination of appropriate services

19. Applies evidence based practice in client-centred care
- considers the research evidence, client preferences, clinical expertise & available resources in making treatment decisions & advising clients
- practises in accordance with relevant clinical practice guidelines
- locates & applies relevant current evidence e.g. clinical practice guidelines & systematic reviews
- assists clients & carers to identify reliable & accurate health information
- shares new evidence with colleagues
- participates in & applies quality improvement procedures when possible

12. Sets realistic short and long term goals with the client
- negotiates realistic short term treatment goals in partnership with client
- negotiates realistic long term treatment goals in partnership with client
- formulates goals that are specific, measurable, achievable & relevant, with specified timeframe
- considers physical, emotional & financial costs, & relates them to likely gains of intervention

11. Identifies and prioritises client’s problems
- generates a list of problems from the assessment
- justifies prioritisation of problem list based on knowledge & clinical reasoning
- collaborates with client to prioritise problems
- considers client’s values, priorities & needs

14. Performs interventions appropriately
- considers the scheduling of treatment in relation to other procedures e.g. medication for pain, wound care.
- demonstrates appropriate client handling skills in performance of interventions
- performs techniques at appropriate standard
- minimizes risk of adverse events to client & self in performance of intervention (including observance of infection control procedures & manual handling standards)
- prepares environment for client including necessary equipment for treatment
- identifies when group activity might be an appropriate intervention
- demonstrates skill in case management
- recognises when to enlist assistance of others to complete workload
- completes intervention in acceptable time
- refers client to other professional/s when physiotherapy intervention is not appropriate, or requires a multi-disciplinary approach
- encourages & acknowledges achievement of short & long term goals

17. Progresses intervention appropriately
- demonstrates or describes safe & sensible treatment progressions
- makes decisions regarding modifications, continuation or cessation of intervention in consultation with the client, based on best available evidence
- discontinues treatment in the absence of measurable benefit

Analysis & Planning

10. Appropriately interprets assessment findings
- describes the implications of test results
- describes the presentation & expected course of common clinical conditions
- relates signs & symptoms to pathology
- relates signs, symptoms & pathology to environmental tasks & demands
- interprets findings at each stage of assessment to progressively negate or reinforce hypothesis/es
- makes justifiable decisions regarding diagnoses based on knowledge & clinical reasoning
- prioritises important assessment findings
- compares observed findings to expected findings

Intervention

14. Performs interventions appropriately
- considers the scheduling of treatment in relation to other procedures e.g. medication for pain, wound care.
- demonstrates appropriate client handling skills in performance of interventions
- performs techniques at appropriate standard
- minimizes risk of adverse events to client & self in performance of intervention (including observance of infection control procedures & manual handling standards)
- prepares environment for client including necessary equipment for treatment
- identifies when group activity might be an appropriate intervention
- demonstrates skill in case management
- recognises when to enlist assistance of others to complete workload
- completes intervention in acceptable time
- refers client to other professional/s when physiotherapy intervention is not appropriate, or requires a multi-disciplinary approach
