"Everything about Bond attracted me to study here, from the picturesque campus to the detail and care I received from day one. Bond University is a place like no other - the focus is not just on the academic side but all aspects of the students' study journey and wellbeing.

The Bond model also provides value beyond just education as you are equipped with real world, practical knowledge, graduate faster than your peers at other universities and can therefore join the workforce sooner."

Entrepreneurship and Innovation

The future will demand a totally new way of thinking: The old 9-to-5 employment model is already breaking down; technology has decentralised the workplace; small ideas have the potential to spark big businesses.

ENTREPRENEURSHIP AND INNOVATION

- Major in Entrepreneurship and Innovation, create your own business enterprise, and bring entrepreneurial attitudes to whatever field you choose to study.
- Develop, pitch and create your own concepts through internal and international initiatives like Bond Business Accelerator, Transformer, Gold Coast Demo Day, The World's Challenge Challenge and Pitch@Palace.

TRANSFORMER PROGRAM

- This free co-curricular program brings students together from all Faculties and disciplines to collaborate on a project of their own choosing or contribute to one of the many other ongoing projects.
- Access to industry experts, mentors, academic coaches, workshops and a cutting edge 24/7 co-working space.
