GENERAL INFORMATION

You are registered into Beyond Bond which is a practical, activity-based program that extends across the duration of all undergraduate degrees.

PROGRAM INFORMATION

The Bachelor of Biomedical Science is a 2-year accelerated degree which provides you with the ideal undergraduate foundation for a career in the health sciences. The program develops your knowledge in the molecular, cellular, anatomical and physiological processes of the human body and prepares you for graduate entry programs such as medicine and the allied health professions. The program will develop your knowledge and laboratory skills across a range of disciplines including anatomy, physiology and pathophysiology, pharmacology, chemistry, biochemistry, cell biology, genetics and microbiology. Extensive laboratory training from the first semester, as well as case studies and problem-solving techniques are applied within a variety of clinical, research and allied health care settings. The program focuses on real world learning, where you will gain exceptional, high-quality practical experience in our health science laboratories. You will be able to develop and master technical scientific and research skills using some of the latest research equipment, from the very first semester. Due to Bond University's small class sizes, you will be able to enjoy extensive use of this equipment and will be able to use the facilities outside of scheduled class times to further develop and refine your practical skills. The laboratories have dedicated laboratory staff to provide support and optimise your learning experience. An innovative feature of the program is the application of problem-based learning in the curriculum, a popular feature in medical programs which creates an engaging student learning experience to increase analytical reasoning and critical thinking skills.

Structure

Assumed knowledge is the minimum level of knowledge of a subject area that students are assumed to have acquired through previous study. It is the responsibility of students to ensure they meet the assumed knowledge expectations of a specified subject. Students who do not possess this prior knowledge are strongly recommended against enrolling and do so at their own risk. No concessions will be made for students' lack of prior knowledge.
