PROGRAM INFORMATION

The healthcare landscape is changing and challenging the way we currently engage with healthcare services. The population is living longer with complex and chronic conditions, and many people have increasing expectations of healthcare and technology.

The traditional, siloed approach to healthcare is becoming increasingly ineffective and inefficient in meeting patients' needs and desires. We require a flexible health workforce that engages in lifelong learning, is technologically savvy, understands research evidence and is able to develop different models and systems of care. We are all being challenged to upskill and prepare ourselves to lead the changes required. Health leaders who think differently can learn to thrive in an environment of disruption and create positive change.

Structure

Assumed knowledge is the minimum level of knowledge of a subject area that students are assumed to have acquired through previous study. It is the responsibility of students to ensure they meet the assumed knowledge expectations of a specified subject. Students who do not possess this prior knowledge are strongly recommended against enrolling and do so at their own risk. No concessions will be made for students' lack of prior knowledge.
