

The details

Bond's accelerated, three-semester-per-year timetable means you can complete the degree and start earning an income in two years - a year ahead of your peers. The Bachelor of Health Transformation is made up of five intersecting components, providing graduates with a robust view of health transformation as well as valuable, flexible skills, and a unique area of specialisation.

The Transformation Core

- Foundations of Enterprise
- Marketing
- Enterprise Law
- Trust, Privacy, Law and Ethics in the Digital Age
- Digital Media and Society
- Design: Process, Methods and Mindsets
- Global Citizenship
- Global Challenges 1
- Global Challenges 2
- Industry Immersion 1
- Industry Immersion 2

Health Studies

- Cell Biology
- Drivers for Healthcare Change
- Evidence in Healthcare: Practice and Policy
- Health Systems
- Principles of Human Structure and Function
- One or both of the following:
 - Global Health Issues
 - Australia's Health Issues and Priorities

The Bond Core Curriculum

Embedded within our undergraduate programs, the Core subjects engage students in developing Bond's three graduate attributes:

- **Capable Individual:** Critical Thinking and Communication
- **Effective Collaborator:** Collaboration, Teams and Leadership
- **Global Citizen:** Responsibility, Integrity and Civic Discourse

Elective Subjects

Working with a personal advisor, students select two or three elective subjects in an area of interest. Subjects are available across faculties and disciplines.

Possible themes include:

- Data Analytics
- Business and Commerce
- Esports
- Media and Communications
- Sustainability

Beyond Bond

A personalised, degree-wide professional learning program where you will develop broad employability skills and engage in a portfolio of experiences to support your transition from study to the workforce.

This program is not available to international students who intend to apply for a student visa to undertake this program. CRICOS Provider Code 00017B
TEQSA Provider Number PRV12072

A new era of healthcare is here

BACHELOR OF HEALTH TRANSFORMATION

Where could a Health Transformation degree take you?

As the healthcare needs of society change, so do the demands on the healthcare system. To keep pace with this new landscape, employers need future leaders in healthcare who think creatively and who effectively manage the new technologies, systems and processes which support effective healthcare delivery.

You can expect to:

- Gain industry experience in leading and managing transdisciplinary teams and projects
- Design, propose and apply innovative solutions to real-world healthcare challenges
- Think critically about the changing demands that society will place on health systems into the future
- Innovate beyond traditional modes of healthcare delivery by linking consumer expectations, public needs and health sector outcomes

Stand out in an expanding industry

As a **Bachelor of Health Transformation** graduate, you will be prepared to take on a variety of roles across the healthcare sector, including:

Business development professional

Clinical informatician

Digital health educator

Digital health engagement officer

Digital healthcare policy advisor

Healthcare communications and marketing specialist

Leader and manager in the health and allied health industries

Medical information officer

WANTED

Health Transformation graduates

Professor Sharon Mickan
Healthcare Innovations
Bond University

“Healthcare is transforming from within and outside, to meet the needs of consumers. New technologies and data management systems provide opportunities for innovation. The traditional professional workforce is still growing, but it is stretched to meet these increasing challenges. A new workforce is required to bring together the human and technological potentials and to facilitate transformation.”
