A MESSAGE FROM OUR DISCIPLINE LEAD FOR CONSTRUCTION MANAGEMENT AND QUANTITY SURVEYING:

DR DANE MILLER

Welcome to the Construction Management and Quantity Surveying discipline which forms part of the Faculty of Society & Design, at Bond University.

Our programs offer a variety of options across the construction area. As one of the largest economic sectors, the construction industry seeks graduates with distinctive skills, knowledge and practical experience across a variety of fields. Our offerings equip graduates with the necessary knowledge to deliver complex construction projects. Our offerings include professionally recognised qualifications that will enhance future career potential. Construction is a fast paced and evolving industry and our programs are designed to provide graduates with access to a wide range of career pathways. Opportunities include building and construction management, contract administration, site management, facilities management, building services, quantity surveying, property development, project management, cost management and general management.

The Construction Management and Quantity Surveying discipline prides itself on the level of practical experience shared between our educators in a field where this is so important. This experience is invaluable to our students and ensures graduates are equipped with the skills to apply innovative and adaptable solutions within complex environments - something which is highly sought after by the construction industry.

Our programs include offerings which are accredited by leading professional bodies. This allows graduates from these programs to differentiate themselves within the industry. Our programs include options internationally recognised by the Royal Institution of Chartered Surveyors (RICS) and the Chartered Institute of Building (CIOB) as well as being nationally accredited by the Australian Institute of Quantity Surveyors (AIQS). These programs also meet the educational requirement set by the Queensland Building and Construction Commission (QBCC) for the granting of an Open Builders Licence.

Our programs are based in Australia's first 6 star, Green Star designed educational building which delivers an unparalleled learning and teaching space. We aim to further develop the progressive principles on which our building was designed, in educating future construction professionals tasked with delivering projects required to keep pace with our expanding population.

Dr Dane Miller

Associate Professor of Construction
Discipline Lead for Construction Management and Quantity Surveying
Faculty of Society & Design, Bond University

A MESSAGE FROM OUR DISCIPLINE LEAD FOR PROJECT MANAGEMENT, PLANNING, AND PROPERTY:

DR DANIEL O'HARE

As we move into the future, ensuring a balance between human needs and the built environment is of the utmost importance. Our Built Environment programs seek to embody world's best sustainable processes, becoming an example for the future and a working laboratory for the eco leaders of tomorrow. As the majority of the world's population now lives in urban areas, there is a significant demand for graduates with expertise in creating and managing sustainable living environments. There is no better time than now to study in City Planning, and related Built Environment professions.

Bond's Sustainable Development building is the first in Australia to achieve a 6 Star Green Star rating - Education PILOT Certified Rating for design by the Green Building Council of Australia. This is the very building where our students partake in lectures, tutorials as well as collaborative discussions and deliberations with academics and peers.

Our programs allow students to tailor their studies to their ambitions and interests. This, balanced with our small classes, practical learning environments, and personalised attention, enables students to optimise their learning experience and leave Bond readily prepared for a career within the Built Environment industry.

To tell you a little bit about myself, I have a Bachelor of Town Planning, a Master of Urban Design, and a Research PhD in Urban Design. My thesis, 'Tourism and small coastal settlements: a cultural landscape approach for urban design' was the starting point for my more recent research on how coastal tourism areas can transform themselves into sustainable city regions. I have been fortunate to undertake international comparative research into urban design and planning approaches in coastal tourism settlements in Australia, the United States, Spain, Thailand and the United Kingdom. I also have extensive practical experience in industry, within the urban design, planning and urban conservation sectors.

I am passionate about the programs offered here in the Faculty of Society & Design at Bond University, and I truly believe our graduates are the future. I look forward to welcoming you to campus and guiding you through your chosen pathway within the Built Environment Discipline.

Dr Daniel O'Hare

Associate Professor of Urban Planning
Discipline Lead for Property, Planning and Project Management
Faculty of Society & Design, Bond University

DIPLOMA

Bond University Diplomas take only eight months to complete allowing you to articulate straight into the third semester of a Bond University degree. Transition into a university degree seamlessly having already been part of the Bond community. Below is an example of some of the degrees our diploma programs credit into.

Diploma of Built Environment	Selection Rank ATAR	Starting	Duration	Fees per semester*
CRICOS Course Code 098537A	50	Jan May Sep	2 semesters (8 months)	\$16,240

The Diploma of Built Environment provides a foundation for a career in various property sectors. This program enables you to specialise in either property or construction management and quantity surveying.

KEY FEATURES

- Complete your diploma in only eight months.
- Integrate into the University environment from day one.
- Have the support of extra tutorials just for diploma students.
- Articulate into a corresponding bachelor program^.

FURTHER STUDY AT BOND

The Diploma of Built Environment is a two-semester program, allowing you to complete your diploma in only eight months. Upon successful completion of the diploma, you can pathway into the third semester of a Bond University undergraduate degree with a possible 80 credit points.

^Refer to Office of Future Students for advice.

A COLLABORATIVE SPACE FOR THE ECO LEADERS OF TOMORROW

The environmentally sustainable extension was formally opened in November 2020 thereby completing the Society & Design Precinct, incorporating the Abedian School of Architecture and the existing Sustainable Development Building.

The extension was designed around the concept of bringing people together in flexible and inspiring teaching spaces. Purpose built, housing a state-of-the-art 40 seat computer laboratory as well as three flexible learning spaces, and an extensive social area the addition enables students to learn, engage and collaborate with their peers, teaching staff and industry guests.

The extension contains recycled materials, including railway sleepers and power poles, contains enough solar panels to power 10 homes, and features charging stations for electric vehicles.

In the Faculty of Society & Design, we want to be at the forefront of contemporary approaches to pedagogy and that means we have to think about not just what we teach, but how and where we teach. As a Faculty, we are challenging ourselves to provide the most active engaged and authentic learning experience possible, the new building with its flexible and innovative set up will help us do this.

UNDERGRADUATE PROGRAMS

Bachelor of Property	Selection Rank ATAR / IB**	Starting	Duration	Fees per semester*
CRICOS Course Code 078181A	65 / 24	Jan May Sep	6 semesters (2 years)	\$17,560

The Bachelor of Property covers a comprehensive range of subjects within the property development and management industry, including construction practices, feasibility studies, finance, investment and valuation, property markets, sustainable development and urban development. This program also provides you with the opportunity to specialise in property valuation.

KEY FEATURES

- Gain professional accreditation by some of the industry's leading professional bodies.
- Learn from nationally and internationally recognised industry professionals.
- Graduate sooner with Bond's accelerated degrees and kick start your career.

PROFESSIONAL OUTCOMES

This degree will provide you with a dynamic range of career pathways in the property industry. Opportunities include property valuation, property development, project management, investment,

finance, portfolio management, asset and facilities management and research. Graduates are also equipped with a comprehensive knowledge of sustainable development, and will be able to seek work anywhere in Australia or around the world.

PROFESSIONAL RECOGNITION

Students graduating with a Bachelor of Property are internationally recognised by the Royal Institution of Chartered Surveyors (RICS). Graduates of this program will also be recognised by the Australian Property Institute (API) for Associate Membership with Certified Property Practitioner (CPP) Certification. Students who complete the relevant property valuation subjects will qualify for certification with the Australian Property Institute as a Certified Practising Valuer with the Valuers Registration Board of Queensland, and New South Wales Fair Trading (conditional on meeting professional practice requirements).

Bachelor of Project Management	Selection Rank ATAR / IB**	Starting	Duration	Fees per semester*
CRICOS Course Code 0101294	65 / 24	Jan May Sep	6 semesters (2 years)	\$17,560

The Bachelor of Project Management concerns projectised decision-making applicable to a wide range of different industry sectors. It builds on three foundation semesters comprising business acumen, project framework, process analysis and core skill development before three further practice semesters comprising technical, tactical and strategic decision-making. The program includes comprehensive coverage of project schedule, cost, resource, scope, quality, procurement, communications, risk and stakeholder management, two elective choices and concludes with a capstone subject on project integration management.

KEY FEATURES

- Learn how to deliver projects on time, within budget, as specified, and with no surprises.
- Be an effective decision maker.

- Complete study in two calendar years full-time or part-time equivalent.
- Built around the PMBOK® Guide, which is the international standard for the project management discipline.
- Gain critical leadership skills.

PROFESSIONAL OUTCOMES

Project management is a global profession, with over 750,000 certified practitioners in Project Management Institute (PMI) alone. Upon completion of the Bachelor of Project Management you will have the skills most needed to keep up with trends, lead a team and problem solve in today's digital era.

(2 years)

\$17,560

The Bachelor of Construction Management and Quantity Surveying covers a comprehensive range of subjects in the field of construction management and quantity surveying, focusing on the management and delivery of complex construction projects. The curriculum addresses a range of topics including construction technology, construction techniques, plant and equipment, site management, contract administration, building measurement, planning processes and risks. It also contains a strong sustainability theme which equips you with distinctive skill sets that are highly sought after in the built environment. All classes in this program are delivered Monday to Wednesday. This provides you with the opportunity to schedule work and study, or participate in work experience.

PROFESSIONAL OUTCOMES

The Bachelor of Construction Management and Quantity Surveying will provide you with access to a wide range of career pathways in the construction industry. Opportunities include building and construction management, contract administration, site

management, facilities management, building services, quantity surveying, property development, project management, cost management and general management. The skill sets obtained in this degree may also be applied to related sectors such as civil engineering and mining. Graduates will be equipped with a comprehensive knowledge of sustainable development, and will be able to seek work anywhere in Australia or around the world.

PROFESSIONAL RECOGNITION

Students graduating with this degree are internationally recognised by the Royal Institution of Chartered Surveyors (RICS) as well as the Chartered Institute of Building (CIOB). This program is also nationally accredited with the Australian Institute of Quantity Surveyors (AIQS), and meets the educational requirement set by the Queensland Building Construction Commission (QBCC) for the granting of an Open Builders Licence.

POSTGRADUATE PROGRAMS

GRADUATE CERTIFICATES

- Graduate Certificate in Building Surveying
Duration: 2 semesters (8 months)
- Graduate Certificate in Construction Practice
Duration: 1 semester (4 months)
- Graduate Certificate in Project Management
Duration: 3 semesters (1 year)
- Graduate Certificate in City Planning
Duration: 1 semester (4 months)
- Graduate Certificate of Valuation and Property Development
Duration: 1 semester (4 months)
- Graduate Certificate in City Planning
Duration: 1 semester (4 months)

GRADUATE DIPLOMAS

- Graduate Diploma in Building Surveying
Duration: 3 semesters (1 year)
- Graduate Diploma in Construction Practice
Duration: 3 semesters (1 year)
- Graduate Diploma in Project Management
Duration: 2 semesters (8 months)
- Graduate Diploma in City Planning
Duration: 2 semesters (8 months)
- Graduate Diploma of Valuation and Property Development

Duration: 2 semesters (8 months)

Master of Building Surveying	Starting	Duration	Fees per semester*
CRICOS Course Code 071287C	Jan May Sep	4 semesters^ (1 year 4 months)	\$15,838

The Master of Building Surveying offers you the chance to increase your knowledge in the field of building surveying. You will study with world-class academics and experienced practitioners in one of Australia's most environmentally friendly buildings. The program comprises two specialist subjects plus six shared core subjects. Completion of a further four postgraduate elective subjects, selected from the suite of programs offered by the Faculty of Society & Design will allow you to graduate with a Master of Building Surveying.

- Intensive delivery mode
- Learn in the University's Sustainable Development Building Precinct, promoting sustainable practices of tomorrow
- Graduate with a professionally recognised qualification
- This program is accredited by Royal Institution of Chartered Surveyors, Queensland Building & Construction Commission (QBCC) and Australian Institute of Building Surveyors Building Professionals Board of NSW

^Part-time study load

Master of Building Information Modelling and Integrated Project Delivery	Starting	Duration	Fees per semester*
CRICOS Course Code 099719J	Jan May Sep	3 semesters (1 year)	\$15,750

This one-year program begins with eight separate micro-credential subjects in important and in-demand aspects of Building Information Modelling, Lean Construction and Integrated Project Delivery. Additionally, it engages students in a challenging capstone project to prepare them for careers as Managers of the modern construction and infrastructure project design and delivery systems, which are rapidly becoming mandatory on both government and major private projects.

This cutting edge program has been designed in strong collaboration with industry to assist construction and other built environment professionals to upskill in order to comply with the stringent practice requirements being demanded by government and knowledgeable private sector clients regarding the use of Building Information Modelling (BIM), Lean Construction Practice (Lean) and Integrated Project delivery (IPD) in optimised construction project delivery. The Master of Building Information Modelling and Integrated Project Delivery program prepares students for advanced involvement as relevant BIM/Lean/IPD Managers in their work environment, for the benefit of projects and their stakeholders. The program is delivered in intensive mode and has the objective of preparing industry professionals to serve as BIM/Lean/IPD managers. While the course does cover various BIM-related technologies, it does not prepare

students to be specialist technicians in the niche areas of the technologies covered by the curriculum. The program includes two capstone subjects (total of 40 credit points) in which students work in teams on a realistic BIM / Lean / IPD project that requires application, analysis and synthesis of complex 'project' data. The program components align with the BIM Framework of buildingSMART Australasia, the open standards of buildingSMART International, the principles espoused by the Lean Construction Institutes of Australia, the United Kingdom and the United States of America, and internationally recognised principles of IPD.

- Developed in collaboration with industry to meet demands of government and industry
- Micro-credentials for each of the eight introductory modules form the foundation for advanced studies and practical experience leading to successful completion of this Masters program
- You can complete in just three semesters (1 year full-time)
- Highly practical and interactive learning, with studio based capstone projects to reinforce assimilation of knowledge, and convert it to finely honed management skills for practical application in the BIM and IPD environments
- This program is accredited by buildingSMART Australasia

Master of City Planning	Starting	Duration	Fees per semester*
CRICOS Course Code 0101288	Jan May Sep	4 semesters (1 year 4 months)	\$15,063

The Master of City Planning program aims to produce innovative practice-oriented graduates with the capacity to play a leading role in creating sustainable cities and regions. This program is designed to equip students for rewarding professional work planning for 21st century global-local challenges including rapid urbanisation, climate change, resource constraints, globalisation and technological disruption. With its distinctive interdisciplinary urban design orientation, the program will cultivate city planners and urban designers with the global perspective, knowledge, skills and

adaptability to make a significant contribution to addressing these challenges.

- Intensive mode delivery
- Highly relevant and in-demand qualification
- Practical learning and cross-disciplinary experiences
- Small class sizes and a personalised approach to learning
- Ability to build and develop ongoing networks with peers and alumni in City Planning and related professional fields of Architecture, Property and Project Management

Master of Construction Practice	Starting	Duration	Fees per semester*
CRICOS Course Code 071288B	Jan May Sep	4 semesters (1 year 4 months)	\$15,785

This program covers a comprehensive range of subjects in the field of construction practice, focusing on the management and delivery of complex construction projects. It also contains a strong sustainability theme which equips you with distinctive skills that are highly sought after in the built environment industry.

- Gain professional recognition by some of Australia's leading professional bodies
- Learn via intensive mode delivery
- Learn in the University's Sustainable Development Building Precinct, promoting sustainable practices of tomorrow

Master of Philosophy	Starting	Duration	Annual fees
CRICOS Course Code 072092F	Jan May Sep	2 years	\$39,760

The Master of Philosophy develops independent research skills and the ability to relate a specific research topic to a broad framework of knowledge. The program places a major emphasis on independent

enquiry (initiative), a thorough understanding of domain-specific knowledge, competence in research methodologies and the ability to communicate research results. This program serves as a pathway to the Doctor of Philosophy (PhD).

Master of Project Innovation	Starting	Duration	Fees per semester*
CRICOS Course Code 0100041	Jan May Sep	4 semesters (1 year 4 months)	\$13,155

The Master Degree explores a number of topic areas centered around emerging job descriptions for project managers, drawn from product manager, designer thinker, change agent, agile coach, business analyst and entrepreneur. The program comprises six core, research methods, research project (double-weighted) and three elective subjects.

- A 10-day International study tour is a core component of the program*
- Digital badges for up to six career specialisations

*Subject to visa approval. Additional costs may apply.

Master of Project Management	Starting	Duration	Fees per semester*
CRICOS Course Code 078813G	Jan May Sep	4 semesters (1 year 4 months)	\$13,243

This program provides a comprehensive business-ready foundation that will equip students from any background with the knowledge required to develop a career and expertise in project management. The program features four distinct study themes including strategy, sustainability, managing complex problems and teams, and virtual teams and global working. External speakers from leading

investment banks, credit agencies and portfolio fund managers contribute to case studies and workshops.

- This program is accredited by RICS (Royal Institution of Chartered Surveyors), Australian Institute of Project Management and Project Management Institute

Master of Valuation and Property Development	Starting	Duration	Fees per semester*
CRICOS Course Code 085561G	Jan May Sep	4 semesters (1 year 4 months)	\$15,750

The Master of Valuation and Property Development provides you with a wide range of skills that can be applied to global property markets. This program is designed to equip you with strong knowledge and advanced technical skills applicable to a variety of career paths such as investment, finance, asset management and research. This degree also provides the opportunity to specialise in property valuation.

- Gain a qualification professionally recognised by some of Australia's leading industry bodies
- Intensive mode delivery
- Small class sizes and personalised approach to learning
- This program is accredited by RICS (Royal Institution of Chartered Surveyors), Australian Property Institute and Valuers Registration Board QLD

PROFESSIONAL MASTER'S PROGRAMS

At Bond University, we also offer a range of Professional Master's programs which include a Professional Portfolio. Professional Portfolio is a 20 week, 45 credit point subject available to Master's (Professional) students in the Faculty of Society & Design. This subject is strongly experientially oriented and encourages students to develop their professional skills in a real world environment.

The subject will ensure that students combine self-analysis and reflective learning skills with professional methodologies, so as to expand analytic and strategic thinking capabilities. It will provide practical experience for students to develop their skills in a profession relevant to their Master's specialisation. All students will complete a 2,000 word scoping document, and either undertake a work placement in Australia for 210 hours (which includes an employer's report) and reflective journal (up to 5,000 words) OR complete a collaborative research project totaling up to 15,000 words.

All students will submit a final professional portfolio collection of documents, highlighting their practical and theoretical expertise in their profession of choice. The Professional Portfolio subject cannot be commenced until the student has successfully completed all 12 subjects of the Master's component of the degree.

The professional portfolio is offered for the following Master's programs:

- Master of Construction Practice (Professional)
- Master of Project Management (Professional)
- Master of City Planning (Professional)
- Master of Valuation and Property Development (Professional)
- Master of City Planning

SUNNY ANDALEBI

Master of International Relations / Master of Project Management

”

Project Management is the perfect complementary degree because the program has excellent theoretical knowledge and practical skills, teaching you to plan and deliver projects on time, within budget and to scope. This is something that all managers and leaders need to understand no matter what industry they are in. What makes it an even better program is that most of the professors have had industry experience and so they are able to integrate their experiences into the assignments for the class.

PROJECT MANAGEMENT DOUBLE MAJOR OPTIONS

AVAILABLE DOUBLE MAJOR OPTIONS

- Master of Architecture / Master of Project Management
- Master of Business Administration / Master of Project Management
- Master of City Planning / Master of Project Management
- Master of Communication / Master of Project Management
- Master of Construction Practice / Master of Project Management
- Master of Criminology / Master of Project Management
- Master of International Relations / Master of Project Management
- Master of City Planning / Master of Project Management
- Master of Valuation and Property Development / Master of Project Management

THE WAY OF THE FUTURE

Introducing Master of Project Innovation / Master of Project Management (MPI+MPM).

CRICOS Course Code 099216K

Duration: 6 semester (2 years)

Starting: January, May, September

The world of project management is changing. Projects and programs are increasingly creative in nature, embedding innovative thinking, and dealing with complex business environments. Innovation in project management, including adaptable (Agile) practices that can respond quickly to opportunities, exploration of alternative solutions and the freedom to experiment, requires a new approach that is not constrained by conventional ideologies and the fear of failure.

The Master of Project Innovation and Master of Project Management are offered as a combined program (MPI+MPM) that reduce the overall duration of study by 25%. Our program is designed to enhance graduate capabilities to meet future challenges in professional practice and up-skill knowledge over time. Project innovation is considered to be the next big thing for the project management discipline.

Graduates receive dual degrees after two years of full-time study. Part-time attendance patterns, comprising 1-2 subjects per trimester, are also available. There are early exit options for Graduate Certificate, Graduate Diploma and Master of Project Innovation. All subjects are delivered as intensive blocks of study rather than weekly classes.

Learn more at bond.edu.au/MPI+MPM.

TESTIMONIALS

JOHNSTON HUYNH

Master of Construction Practice
Graduate Engineer, Multiplex

”

The construction industry is extremely vast with so many different specialty roles, and the program at Bond is perfect for prospective students who are drawn to, but not entirely aware of the different career paths construction can take you down. As a whole, the Bond experience helps the transition from university student to employee. There is so much more to construction than pen to paper. Being personable is just as important as technical ability and every experience at Bond has contributed to honing these skills.

LLOYD HOLFORD

Bachelor of Property
Student

”

I chose to study at Bond University for the accelerated degree, and as it also provided me the most useful and relevant course for the industry I want to work in. My initial impression of the University was its professionalism, efficiency and high standard of education, and Bond has definitely lived up to its reputation. A main highlight of my experience so far has been the exposure to industry experts and lecturers, along with the new friends I have made and networked with. Bond is a world-class university that provides current real-life knowledge and opportunities that can't be found anywhere else.

CECILIA TRUCHI

Master of Project Management (Professional)
Junior Project Manager / Real Estate
Operations Manager, French Ministry of
Foreign Affairs

”

I completed a Master of Project Management (Professional) at Bond University in 2016. I chose this program after I undertook an internship in Project Management as part of undergraduate qualifications in Civil Engineering. Bond appealed to me due to the location of the campus and the structure of the program.

My favourite thing about studying at Bond was the high-quality professors who always made themselves available, always listened and provided help. In my last semester of studies, I was fortunate enough to undertake an internship at Find A Site Town Planners. I secured this internship through a networking event on campus held by the Bond University Construction Network Association. Currently, I am a Junior Project Manager / Real Estate Operations Manager for the French Ministry of Foreign Affairs. Bond helped me prepare for this role and my responsibilities by making me comfortable in taking 'risks' and deal with the unknown.

CAPSTONE PROJECT: SOLOMON ISLANDS

WHAT IS A CAPSTONE PROJECT?

A capstone project is also commonly referred to as a capstone experience, as it is a multifaceted and experiential by nature. Capstone projects are designed to encourage students to think critically, solve challenging problems, and develop skills such as communication, public speaking, planning, time management, collaboration, teamwork and goal-setting; all to assist with ease of transition into the workplace while also building life-experience.

ABOUT THE TRIP?

The trip is a part of the Capstone Project subject (SSUD13-300) offered within the Faculty of Society & Design. This subject provides an opportunity to undertake an inter-disciplinary group investigation of an urban development and / or environmental management project, bringing together a student's understanding of development of a project brief, project implementation and final reporting and evaluation of a real, quantifiable project. Students undertaking the subject will apply their learned skills and knowledge for authentic application in a foreign environment, working towards improving and contributing to a wider community.

GRACE FERRAZ

Built Environment Student
Gold Coast, Australia

”

This Capstone Project was one of the most valuable experiences during my time at Bond University. Being able to go to another country and practice what I've been taught in the classroom has been an experience I'm so grateful for. If I'm able to say I've made even the slightest improvement in someone else's life, let alone a whole town, that is something that will forever stay with me! When I look back at my time studying and am able to say that I've helped change KiraKira, I think that's very special and something I feel very lucky to have been a part of.
