<b>SUBJECT INFORMATION</b>					
<b>GENERAL INFORMATION</b>					
You are registered into Beyond Bond which is a practical, activity-based program that extends across the duration of all undergraduate degrees.					
<b>PROGRAM INFORMATION</b>					
The Bond University Bachelor of Health Sciences is a 2-year accelerated degree designed for students who wish to explore a variety of disciplines in the health sciences, as well as providing a pathway to postgraduate specialised study. During this program, you will gain an understanding of basic and applied sciences including the anatomical, molecular, physiological and psychological processes of human health and function. The program provides a degree of flexibility, enabling you to select a variety of subjects to explore which best suit your career and study goals. The program focuses on real world learning, where you will gain exceptional, high-quality practical experience in our health science and human movement laboratories. You will be able to develop and master technical scientific and research skills using some of the latest research equipment, which can be applied across a broad range of industries. Each laboratory has a maximum capacity – ensuring small group learning and personalised attention. This program provides an undergraduate pathway into Bond University’s Master of Occupational Therapy, Master of Nutrition and Dietetic Practice, or research based honours.

<p><b>Assumed knowledge is the minimum level of knowledge of a subject area that students are assumed to have acquired through previous study. It is the responsibility of students to ensure they meet the assumed knowledge expectations of a specified subject. Students who do not possess this prior knowledge are strongly recommended against enrolling and do so at their own risk. No concessions will be made for students' lack of prior knowledge. Please check for all requirements on your subject outline prior to enrolment.</b></p>
