

What have we been simulating?

One of the big highlights of this past month is related to our core business –simulation! Our trauma simulation this month brought together ENT, anaesthetics, trauma, ED, and theatres, to care for a patient with blunt airway injury. It prompted high level conversations about team interfaces.

What have we been publishing

It's been a busy time for Bond TSC and our partners. Check out some of the below to get a sense of what we have been doing in papers, blogs and podcasts.

- October Simulcast Journal Club with Ben and Vic!
- "How do simulation educators learn the 'tech' stuff" by Vic Brazil on ICEnet
- "Translational Simulation and the EHR" by Kara Allen, Rebecca Szabo, Nova Barrios and Eve Purdy on ICEnet

Where have we been?

Singapore!

Vic visited SingHealth Duke-NUS and the Woodlands Health Quality Day. She learned about all sorts of amazing initiatives including their "Good Catch" Awards!

The Women's and Bond TSC Collaboration - Melbourne

Vic, Ben and Eve had a great time with Rebecca Szabo and the stellar team from The Women's. We shared three days of workshops in Melbourne! Together we explored:

1. High performance in clinical teams
2. High performance for hospital leaders
3. Tech hacks for simulation teams

CODA - Melbourne

Vic, Eve, and Jesse were involved in a panel at CODA related to redesigning resuscitation. Rebecca Szabo gave a Keynote highlighting the impact of simulation in COVID. Mostly it was an excellent excuse to catch up with many simulation and ED/Critical Care friends!

**BOND
UNIVERSITY**
TRANSLATIONAL SIMULATION

New Course!

[HPER71-118: Translational Simulation in Healthcare](#)

Translational simulation employs diverse simulation techniques for healthcare improvement. The approach is twofold - exploring team and system performance in complex healthcare environments and testing planned changes in physical space or clinical processes. Participants in this program will learn to design and deliver translational simulation programs focused on

bond.edu.au

Looking for a formal qualification in Translational Simulation?

We are running this subject in January semester next year!!!

to learn more click [here](#)

The subject is either standalone or can be part of a Masters of Healthcare Innovations.

Will be a bespoke experience, with a small class, and hybrid delivery.

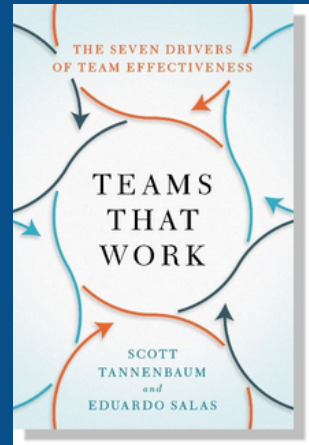

Opportunity for a coached and mentored experience through a personal translational simulation project

Contact vbrazil@bond.edu.au for more details.

What we are reading

Teams that Work by **Scott Tannenbaum and Eduardo Salas**

If you are coaching teams, this is a must read book. It covers the seven drivers of team effectiveness. Well supported by evidence, the book has practical tips for teams related to capability, cooperation, coordination, communication, cognition, coaching, and conditions. It will likely become our go-to "text book" for thinking about why teams work...and when they don't!

Simulation : Reconnect

Wed 16th Nov 2022, 10am – 4pm @ Bond University campus, Gold Coast
