GENERAL INFORMATION

The Doctor of Physiotherapy program offers an innovative problem- and case-based learning model of physiotherapy education to prepare entry-level physiotherapists for their roles and responsibilities as first-contact practitioners. The program integrates the clinical, pathological and related basic sciences with the physiotherapy knowledge, skills and professional behaviours and attitudes required to examine, diagnose and treat physiotherapy clients. The Doctor of Physiotherapy assists students to progressively develop and apply their knowledge, skills and professional attitudes and behaviours to undertake physiotherapy practice and places a strong emphasis on clinical experiential learning with up to 1440 hours of learning in a clinical environment. Clinical practice experiences are designed to produce work-ready, entry-level graduates who are competent to practice across the lifespan in a range of environments and settings. Variable experiences across the lifespan are sought in a range of clinical settings. These will include acute care (such as general cardiorespiratory and orthopaedics), inpatient or outpatient rehabilitation, and musculoskeletal outpatients (such as hospital outpatients or private practice). Students may also have the opportunity to experience a diverse clinical setting in line with their interests such as paediatrics, women's/men's health, specialist acute care services, sports, and rural, remote or international placements, dependent on placement availability. In the final semester, students complete a research project and an elective placement or elective coursework subject, both of which are designed to extend the skills and knowledge of the student beyond commonly encountered clinical experiences. These extending clinical / research and coursework opportunities are designed to ensure graduates are well prepared for entry into the physiotherapy

PROGRAM INFORMATION

The Bond University Doctor of Physiotherapy program has been accredited as an entry-level program by the Australian Physiotherapy Council and is listed as an approved program of study by The Physiotherapy Board of Australia.

SUBJECT INFORMATION

CC-63034		Doctor of Physiotherapy			
Version	4				
Total Subjects	20	Total Credit Points	240	Cricos Code	075478G
Structure	20 Required Subjects				
<p>Assumed knowledge is the minimum level of knowledge of a subject area that students are assumed to have acquired through previous study. It is the responsibility of students to ensure they meet the assumed knowledge expectations of a specified subject. Students who do not possess this prior knowledge are strongly recommended against enrolling and do so at their own risk. No concessions will be made for students' lack of prior knowledge. Please check for all requirements on your subject outline prior to enrolment.</p>
