OPEN ACCESS POLICY

Policy Owner: University Librarian
Contact Officer: University Librarian
Endorsement Authority: University Registrar
Date of Next Review: November 2026

1. PURPOSE AND OBJECTIVES
Bond University is committed to free and open access to the research and scholarly outputs of the Bond community. An open access approach facilitates the worldwide communication of the University’s scholarly works and research data, passing on the benefits of research findings to other researchers, professional practitioners, and the wider community. An open access approach enhances Bond’s research profile, maximising the impact of the University’s research and scholarship.

This Policy supports the principles and promotes an open access approach through dissemination of the University’s scholarly research outputs lodged in the institutional open access digital repository, the Pure Research Portal, and other open access archives (Green Open Access) and through support for open access publication in open access journals (Gold and Diamond Open Access) and hybrid journals under Read & Publish Agreements.

2. AUDIENCE AND APPLICATION
All staff and research higher degree and professional doctorate candidates.

3. ROLES AND RESPONSIBILITIES

<tr>
<td>Library Services</td>
<td>Clause 4 provides advice on all aspects of open access publishing including copyright issues</td>
</tr>
</tbody>
</table>

4. POLICY STATEMENT
4.1 Library Services provides advice on all aspects of open access publishing including copyright issues. Services and support to facilitate open access dissemination of research outputs in the institutional open access repository and in open access publications are also provided by Library Services, including subscription to appropriate Read & Publish Agreements with publishers.

4.2 Where possible, material representing the total publicly available research and scholarly output of the University is to be deposited in the University’s open access digital repository, including:

1. Research publications and associated data that are outputs of ARC (Australian Research Council), NHMRC (National Health and Medical Research Council) or other public funding agency grants.
2. The ‘Accepted Version’ of journal articles. (Taking into account funder policies and publisher embargoes.).
3. Full-text articles/papers in Word format that have been submitted to a publisher (The ‘Submitted Version’ or pre-print).
4. Un-refereed research literature and media including, conference papers, presentations, videos, posters, and other digital outputs.
5. Bond University Higher Degree Research (HDR) theses are made openly accessible on the University’s Research Portal upon final submission or when an embargo over a thesis expires. Theses can be made available under a Creative Commons Non-commercial No Derivatives licence, unless a more liberal Creative Commons licence is requested.
6. Research data which can be described and made openly available under licence, or via negotiated or controlled access (see the Research Data Management & Sharing Policy Clause 8).

Authors are encouraged to retain the right to place a full text version of peer reviewed articles (the Accepted Version) in the institutional repository, with the consent of co-authors where applicable.

4.3 Material intended for commercialisation or containing confidential information should not be submitted for deposit.
4.4 Depositing material in the University’s open access digital repository does not transfer copyright to the repository. Copyright remains with the author or publisher as per the publishing agreement or public re-use Creative Commons licence.

4.5 Use of external grant funding or discretionary University, Faculty, or Research Centre funding may be provided to cover the publishing costs, i.e., Article Processing Charges of accepted open access publications.

5. DEFINITIONS, TERMS, ACRONYMS

**Accepted Version**
The version of an academic paper after peer-review. It incorporates the changes made as a result of the peer review process and is the version accepted for publication. Also called a ‘post-print’, or the ‘Author's Accepted Manuscript (AAM)’.

**Article Processing Charge (APC)**
Gold OA journals have author fees to cover the cost of publishing instead of reader subscription fees. Payment of this fee allows immediate access to the full text published version of the research article.

**Creative Commons**
Creative Commons (CC) offers a range of licences that creators can use to manage their copyright in the digital environment. Under a CC licence the copyright holder keeps copyright but allows people to copy and distribute the copyrighted work provided they meet the stipulations stated in the licence.

**Diamond Open Access**
A scholarly publication model where journals do not charge fees to authors or readers.

**Embargo**
A period during which access to the published, or final, version of a work is restricted.

**Gold Open Access**
Under this model an 'Article Processing Charge' is paid by the author so that the resulting paper can be made freely and openly available without the requirement for the reader to pay for access, and without the restriction of an embargo period. Gold Open Access journals make every paper freely accessible and the published papers can also be deposited in institutional repositories.

**Green Open Access**
Green OA allows authors to self-archive a version of their article for free public use. This is the model used by the Bond University repository and other institutional and/or subject repositories where the Accepted Author’s Manuscript or other versions (Submitted) are uploaded at no cost to the author or reader.

**Hybrid Open Access**
In this model only some of a journal's content is openly accessible. These are journals where some authors have paid to make their papers open access, but other papers are published under a traditional subscription model where payment is made by subscribers.

**Metadata**
The information that describes a research output deposited in the repository, e.g., author, title, abstract, keywords, date, copyright statement.

**Open Access (OA)**
Open Access means that the outputs of scholarship and research are made available online and world-wide, in perpetuity, free of charge and free of other access restrictions.

**Peer-review/Refereed**
The subjection of an author’s work to a process of scrutiny by others who are experts in the field before publication.

**Published Version**
The final version of an academic paper as published, that includes the publisher's formatting and typesetting. Also called the 'Version of Record (VOR)'.

**Read & Publish Agreement**
An agreement that bundles the subscription costs to read journal articles with an allowance for Article Processing Charges.

**Scholarly Research Outputs**
Articles (refereed or un-refereed), books or book chapters, reports, conference proceedings, non-textual works, in digital or electronic form. Computer programs, education resources or administration material are not treated as scholarly outputs.

**Submitted Version**
The version of an academic paper prior to peer-review. Also called a ‘preprint’.

APPROVAL AUTHORITY: Vice Chancellor
MANAGEMENT OF THE UNIVERSITY’S RESEARCH OUTPUTS MADE AVAILABLE IN THE PURE RESEARCH PORTAL

Library Services ensures ongoing archiving and open access to Bond University’s research outputs through the open access digital institutional repository, the Pure Research Portal.

Material will be retained indefinitely in the repository.

Library Services manages the copyright compliance, collection, and validation of all research outputs into the repository and assists authors with publisher open access, embargo, and copyright policy enquiries.

Deposit and full access to material in the institutional repository depends on one of the following copyright compliance conditions:

- Copyright is held by the author who authorises deposit into the repository; or
- Written permission has been gained from the copyright owner to deposit the material into the repository; or
- The publisher as copyright owner allows, by policy permission or licence, deposit of the material in the repository; or
- The material carries a Creative Commons licence.

Authors are encouraged to retain copyright in their work where possible (by not assigning copyright to the publisher), and where the publisher insists on a transfer of copyright, to assert their right to deposit their work in the institutional open access repository using a suitable agreement addendum.
