## Introduction

This Yearbook presents the results of the Australian Law School Annual Survey conducted between August and December 2021. The questions in the survey related to the calendar year 1 January 2020 to 31 December 2020. The Survey had ethics approval from the Office of Research Services at Bond University (approval no. NJ02774). Twelve law schools completed the Survey. The Survey was anonymous, and the names of the law schools that completed the Survey are not provided in this Yearbook.

The goal of the Survey and of this Yearbook is to enable comparison of programs, facilities and student outcomes; identification of best practices; facilitation of change implementation; support for legal education research and scholarship; and tracking of changes over time.

The Survey and this Yearbook are both organized as follows:

1. Law school: School specific information to allow analysis by type, location and age of institution, law school structure and jurisdiction.
2. Law programs: The programs offered by the law school.
3. LLB and JD program structure: The specific features of each program.
4. Program Delivery: How programs and subjects are delivered, including information about compulsory class attendance, lecture recording and learning management systems.
5. Assessment: Forms of assessment and approaches to grading.
6. Extra-curricular and other learning experiences: Various extra-curricular, work-integrated and other learning experiences.
7. Entry requirements: Academic and English language entry requirements
8. Student numbers and demographics: Student enrolment numbers and demographic meta data.
9. Staff and Structure: Academic (full time, part time, casual) and administrative staff numbers and meta data
10. Leadership Team: Law school staff leadership and demographic meta data.
11. Aspirations: Career aspirations of law students.
12. Outcomes: Employment outcomes and postgraduate study.

Questions in the survey have been renumbered in this report to facilitate coherence and analysis.

Only the surface level results of the survey are presented here. Legal education researchers and scholars who would like access to the anonymised data in full to conduct a deeper analysis are welcome to contact the CPLE at cple@bond.edu.au. In this regard the information collection in Section 1 will be particularly useful.

| :--- | :---: | :---: |
| Yes | 4 | $44.4 \%$ |
| No | 5 | $55.6 \%$ |
| Total | 9 | $100 \%$ |

19. Please provide details of the benchmarking.

## Answer

Benchmarking undertaken against all other Australian LLB and JD programs Market analysis of structure of LLB and range of offerings, CALD accreditation compliance assessment undertaken, comparative data assessed where available (some data, such as attrition rates are not publicly available), comparison of unit content (including Priestley units). Benchmarking of the degree and units through Peer Review Portal. Whenever structural changes are proposed or new units are introduced, there must be an assessment of the market, viability, mapping of the units to skills development, TLOs, course learning outcomes and AQF levels etc. Note that the Law school is currently undergoing its five year review now (2021 - there was no option to select this above).
Curriculum Review process was informed by a thoroughgoing benchmarking exercise of the core law curricula of eight comparable law schools: Deakin University, La Trobe University, Queensland University of Technology, Southern Cross University, University of Newcastle, University of Southern Queensland, University of Wollongong, and Western Sydney University
Benchmarking took place against the other Group of Eight LLB programs, the Melbourne JD, and the LLB programs offered by Bond and UTS. The Melbourne JD and the Bond and UTS LLBs were benchmarked because of their consistently good rankings by students and ranking agencies.

Answer
Only available for last course for completion of program, at 4549\%.
If a student achieves between 45-50\% in a course they are offered supplementary assessment and if they pass the supplementary assessment they are awarded a conceded pass for the course.
During 2020.
59. Supplementary assessment: In what circumstances were students eligible to sit supplementary assessment?

| narrowly may be eligible to sit a supplementary exam |
| In the event that the student missed the primary assessment due to illness or other |
| special circumstances and they successfully applied for Special Consideration |

60. Special consideration: Were students able to apply for 'special consideration' in the marking of their assessment?

| Answer | Count | $\%$ |
| :--- | :---: | :---: |
| Yes | 7 | $63.6 \%$ |
| No | 4 | $36.4 \%$ |
| Total | 11 | $100 \%$ |

61. Please provide details

## Answer

Special consideration is guided by the Assessment and Results Policy and is assessed on a case-by-case basis for circumstances that:

- Have an expected duration of less than six weeks, and
- Adversely impact a students' ability to undertake, prepare for, and/or complete an assessment task (e.g. an exam or assessment).
Every situation is unique and eligibility for special consideration is determined on a case-
by-case basis related to a students' circumstances and the relevant supporting documents they provide.
For illness in exam.
3 marks for adverse events, including eg, major medical, impact of natural disaster etc. Special consideration was not able to be granted to convert a fail to a pass in a Priestley unit.
Circumstances that have adversely affected a student's academic performance are those circumstances beyond a student's control and could not have been reasonably anticipated, avoided, or guarded against such as: an unexpected illness or exacerbation of an existing illness; the illness/death of a family member; trauma; misadventure; being a victim of crime.
Based upon Study Plans for individual students.
Students make an application to the unit teacher, before the final exam, explaining the circumstances that have during the semester allegedly affected their learning (eg illness). The teacher is then expected (if valid) to take such "special circumstances" into account in determining the student's final grade.
If a student had an approved application for special consideration, then no late penalty was applied in the period approved. In exceptional circumstances an approved application for SC may mean that a student is provided with a different form of assessment or the grades from other assessments might be averaged.

62. Mandated distribution of grades: Was there an anticipated / expected / mandated distribution of grades in each subject?

| Answer | Count | \% |
| :--- | :---: | :---: |
| Yes | 4 | $36.4 \%$ |
| No | 7 | $63.6 \%$ |
| Total | 11 | $100 \%$ |

63. What were the consequences of a distribution not aligning with the anticipated / expected / mandated distribution?

## Answer

Subject Coordinator to justify.
The JD Board of Examiners review grades in each compulsory subject and recommend moderation to adjust grades if required.
Only anticipated - review of papers and discussion at discipline meetings as to why this does not fit within expected parameters.
Marks would be scaled so as to conform with the mandated minimum percentages in each grade band.
64. Mandated referencing style: What was the mandated referencing style for students?

| Answer | Count | $\%$ |

7.0 overall (min. 6.5 in each subtest) Only Academic version results obtained within 2 years of the course start date.
7.5.

## Section 8: Student numbers and demographics

These questions identify the actual student enrolments in the law school's main programs as expressed in Equivalent Full Time Student Load (EFTSL). The results will provide an accurate picture of the numbers and demographics of law students studying and graduating each year.
This data is of particular value given concerns expressed by some regarding the alleged 'over supply' of law graduates.
