

STUDENT FOR A SEMESTER SUBJECT TIMETABLE – MAY 2024

Information provided in this document is correct at the time of distribution and is subject to change. Please contact the program coordinator for other lecture/tutorial times that may be available by emailing domestic@bond.edu.au or visiting www.bond.edu.au/timetable. Please note: We cannot guarantee that you will be placed in your requested timeslot as priority is given to full-time university students and is subject to availability. The subjects are listed in alphabetical order by study area.

SUBJECT AND DESCRIPTION			
Business and Commerce	Accounting Principles ACCT11-100 This subject provides a thorough grounding in accounting with an emphasis on financial reporting and no prior knowledge of accounting is required. It covers the basic financial statements used in financial reporting, the accounting cycles, some contentious reporting issues, reporting analysis and the interpretation of financial statements. Learn more.	Computer Lab 1 Monday 5-7pm	Computer Lab 2 Wednesday 5-7pm
	Business Statistics STAT11-111 This subject will introduce students to the quantitative tools that are necessary for day-to-day business needs. The objectives of this subject are to: (a) provide a basic knowledge of the application of mathematics and statistics to business disciplines; (b) develop an ability to analyse and interpret data to provide meaningful information to assist in making management decisions; and (c) develop an ability to apply modern quantitative tools (Microsoft Excel) to data analysis in a business context. Learn more.	Forum Tuesday 9-11am	Computer Lab Thursday 9-11am
	Elementary Maths STAT10-100 This subject provides students with the opportunity to bring their Quantitative Mathematics skills up to a standard that is required for future Business subjects at Bond University. It also provides new material that is essential to the understanding of business-related problems. Topics that are covered in this subject include algebraic expressions; formulating and solving linear equations and inequalities from word problems.	Forum Monday 5-7pm	Tutorial Thursday 5-7pm
	Marketing Fundamentals MKTG11-100 This subject is designed to teach students how to manage the relationship between businesses and their customers. It covers the nature of customers, marketing tools and the broader environment within which the marketer operates. Learn more.	Seminar 1 Monday 5-7pm	Seminar 2 Wednesday 4-6pm
	Principles of Economics ECON11-100 This introductory subject will equip students with the tools of economics and how these are applied in real-life situations. Participants will gain an understanding of how to address economic problems in their own lives as well as in industry, politics, society, and the wider environment. Learn more.	Forum Monday 3-5pm	Tutorial Wednesday 4-6pm

Please note: We cannot guarantee that you will be placed in your requested timeslot as priority is given to full-time university students and is subject to availability. The subjects are listed in alphabetical order by study area.

CoLab	Trust, Privacy, Law and Ethics in a Digital Age COLB12-110 The transformation of business, government and culture to digital processes and virtual spaces creates new business and governance opportunities and introduces a range of new risks. This subject introduces a range of trust, privacy, ethics and governance challenges arising from digital practices, including legal and ethical considerations relevant to the spread of technology and its concomitant effects on the collection, storage and use of information. Using a transdisciplinary, case-based approach, students will analyse significant controversies from a range of disciplines whilst applying a multi-disciplinary perspective. Learn more.	Seminar 1 Tuesday 3-5pm	Seminar 2 Thursday 3-5pm
	Cinematography Style and Design FITV12-202 This highly-practical, workshop-based subject introduces students to professional digital cinematography cameras, with PL mounted lenses, and modern lighting equipment. Students analyse cinematic composition and lighting design across a range of genres, and undertake various assignments that develop their essential skills for creatively producing professional images. Learn more.	Forum Wednesday 8-10am	Practical Wednesday 10am – 12pm OR Wednesday 2-4pm
Communication, Film and Creative Media	Directing Actors FITV12-201 This subject explores the actor/director relationship. It introduces students to the approaches and practices of working with actors to rehearse and achieve powerful screen performances. Furthermore, it demystifies how actors approach their work, the language they use to discuss their work, and the theoretical models developed over the past century, such as Stanislavski, Brecht, and Method, upon which most actors build their performance techniques. Learn more.	Forum Wednesday 3-5pm	Practical Wednesday 6-9pm
	Foundations of Content Creation COMN11-100 In this subject, you will learn essential and foundational creative and technical skills necessary for successful careers in the creative and communications industries. You will learn the theoretical and practical fundamentals of visual, textual, and audio design and narrative across multiple digital and online platforms. Across the semester, you will build a portfolio of creative communication pieces. Learn more.	Computer Lab Wednesday 2-5pm

Construction	Transforming Places SSUD11-103 The Property and Construction industries play an important role in the creation and transformation of our built environments. In this subject, students are introduced to the processes involved in property development and construction projects and the roles and responsibilities of, and relationships between the various professionals and other industry stakeholders. Through the exploration of 2D drawings, 3D models and physical buildings, students gain an understanding of the history and current practices of design, engineering and construction. Learn more.	Forum Tuesday 1-3pm	Tutorial Tuesday 3-4pm
	Australia's Health Issues and Priorities HPER11-101 This subject introduces students to Australia's priority health issues, as determined by analysis of key indicators such as burden of disease, risk factor prevalence, determinants of health and opportunities for interventions across the health system, now and into the future. This subject will introduce students to thinking about major health issues across the spectrum of the health system (prevention through to treatment), by analysing the biological, psychological, social and environmental determinants of health, and using this analysis to identify opportunities to improve health. Learn more.	Forum Wednesday 2-4pm	Workshop Friday 2-3pm
International Relations	World Languages LING11-102 World Languages provides you with an insight into a fascinating world of human languages. The innovative subject prepares you for the challenges of language learning and gives you the opportunity to 'taste' languages which you can study at Bond University. The subject explores how languages are interconnected with communities and their cultures, why we all sound different and how languages we speak condition our world view. You will also learn why learning languages can be difficult and why the advantages of you learning an additional language are monumental. Learn more.	Forum Tuesday 11am - 1pm	Tutorial Wednesday 2-3pm
Law	Australian Government and Politics LAWS13-514 Australian Government and Politics is an undergraduate elective subject offered by the Faculty of Law. This subject is a practical examination of the legal and constitutional framework within which Australia is governed and offers an overview of the operation of the Legislatures, Executive Governments and Judiciaries of the Commonwealth, State and local governments. It examines the political foundations upon which Australian politics and government are conducted, including the role, organisation and operation of the media, political parties, candidates, Ministers and governments. Learn more.	Seminar Wednesday 3-6pm

Law	Business Law LAWS10-100 <p>This subject is an introductory level examination of the law regulating business in Australia today for accountants, business managers and other non-legal professionals. The subject seeks to develop students' knowledge of the Australian legal system, their ability to solve simple legal problems involving torts, contracts, consumer protection, competition regulation, intellectual property and employment, and their knowledge of the laws associated with starting, managing, financing and closing a business. Learn more.</p>	Forum Wednesday 4-6pm	Tutorial Tuesday 3-4pm
	Contemporary Issues in Law & Society LAWS13-115 <p>Contemporary Issues in Law and Society is an undergraduate elective subject offered by the Faculty of Law. This subject is not a technical law subject. It explores some of the social and contemporary controversies which surround law. The goal is to create cross-disciplinary debate on how to solve contemporary problems such as: the role of law as a social system; the impact of science in an era of human cloning and designer babies; freedom of expression, media regulation and hate speech; government regulation of social media; criminal sanctions and punishment; and gender issues. Learn more.</p>	Forum Tuesday 5-7pm	Tutorial Tuesday 4-5pm
	Enterprise Law LAWS10-210 <p>This subject is an introductory level examination of the law regulating enterprises in Australia today. Students will develop a foundational understanding of the Australian legal system and the laws associated with starting, financing, managing, and closing an enterprise. They will also cultivate the skills and knowledge to recognise and respond appropriately to legal problems, including those involving causing harm, making and enforcing deals, dealing with consumers and competitors, and protecting IP.</p>	Forum Thursday 6-8pm	Tutorial Tuesday 4-5pm
Psychology	Foundations of Psychology: Biology and Personality PSYC11-100 <p>This subject introduces students to the science and profession of psychology. The subject overviews theory and research across a number of domains within the discipline (e.g., Biological Psychology and Personality) and describes how research in these domains contributes to our understanding of human behaviour. This subject also aims to develop a critical thinking perspective on issues and findings in psychological research. Learn more.</p>	Forum Thursday 9-11am	Tutorial Thursday 2-3pm OR Friday 3-5pm
