**GENERAL INFORMATION**  
NA

**PROGRAM INFORMATION**  
Bond University's Graduate Certificate in Health Systems is a program designed for health professionals from all medical, nursing and allied health disciplines, as well as health administrators, academics and others interested in health systems and health care. In this program, you will develop a sound understanding of Australia's health systems and be able to compare them to international programs based on foundation knowledge of evidence based practice. You will then be able to discuss how to bring about innovative and sustainable models of care within the health system. The Graduate Certificate in Health Systems forms part of a suite of offerings that lead to the Master of Health Innovations program. To enable busy professionals to work while undertaking the program it is offered full-time over one semester, or part-time. Most subjects also have intensive face to face workshops conducted concurrently with other subjects, to enable you to attend face-to-face only once or twice per semester. (All other material will be offered using blended learning approaches).

**SUBJECT INFORMATION**  
HPER71-112 is offered in both the January and May semesters.

Structure					
<b>Assumed knowledge is the minimum level of knowledge of a subject area that students are assumed to have acquired through previous study. It is the responsibility of students to ensure they meet the assumed knowledge expectations of a specified subject. Students who do not possess this prior knowledge are strongly recommended against enrolling and do so at their own risk. No concessions will be made for students' lack of prior knowledge. Please check for all requirements on your subject outline prior to enrolment.</b>
