

**Teaching Fellow
Simulated Participant Program
Faculty of Health Sciences and Medicine**

Essential

- Four years of tertiary study or equivalent experience.
- Experience in special effects makeup techniques or moulage development
- Dedication to high-quality teaching and learning, as evidenced by engagement in contemporary university-level educational activities, preferably with experience in clinical practice settings.
- Demonstrated experience in overseeing or coordinating projects, specifically involving authentic learning environments such as simulations or special effects.
- Excellent interpersonal and group communication skills, demonstrating the ability to establish and foster effective working relationships at all levels, both within the university and with industry partners.

Desirable

- Experience in curriculum development and/or teaching, and at the undergraduate university level.
- Experience in research and development of special effects techniques, such as 3D printing or mould development.
